### Spare parts for MARTIN horns 2097 GM and 2298 GM

Guidance on fitting:

After parts have been fitted it is essential for you to test the entire MARTIN horn thoroughly. You should, above all, make certain that the electric blower runs smoothly and does not deviate any more than 5% from the performance data stamped on the identification plate (power consumption, rpm of shaft, duration of signal, response range).

<u>Order number</u>		<u>Price €</u>
70-5105	plain disk for 2097	9.00
70-5106	plain disk for 2298	9.00
2604.63	Screw-on cover for valve socket, anodized aluminium, 27 mm Ø	21.00
