BM Belgium: a' a' h' h'

### Bracket for diaphragm acoustic horn

Article No. 2529-04

Our newly developed anodised aluminium brackets make assembly much easier. The horns can be mounted from one side and fixed in any direction.

**The bracket can also be combined with the elbow connections, article No. 2568.14.**

To reduce the installation height, the threaded sleeve can be shortened by 15 mm (avoid chips in membrane housing).
